PORTABLE

LIGHTWEIGHT

BRUSHLESS | 35K RPM

3/32" (2.35mm) & 1/8" (3.18mm) Handpieces

The preferred choice of technicians, carvers and makers.

EASY TO USE

Specially designed for

Works with all standard rotary tool accessories

Digital RPM display supports safe use

Minimal Vibration • Whisper Quiet

CONTROL BOX

Switch:	Forward/Reverse	<i>Bi-directional</i>
Battery:	Li - Ion	<i>Rechargeable</i>
Operating Time:	~ 10 hrs	<i>Long-lasting</i>
Charge Time:	5 hours	<i>Quick</i>
Dimensions:	5.4" x 2.7" x 1.1"	<i>Compact</i>
Weight:	8.7 oz	<i>Lightweight</i>

HANDPIECES

Design:	Slim	<i>Ergonomic</i>
Motor:	Brushless	<i>Modern</i>
Speed:	0-35,000 RPM	<i>Fast</i>
Dimensions:	.75" x 5.1"	<i>Pencil Grip</i>
Weight:	4.4 oz	<i>Lightweight</i>

ITEM	DESCRIPTION	QTY
1000	Set with 3/32" Handpiece	1
1001	Handpiece 3/32"	1
1002	Set with 1/8" Handpiece	1
1003	Handpiece 1/8"	1
Sets include control box, handpiece, belt clip and charger.		

Caution: Always wear safety goggles when operating power tools

Dedeco International, Inc.

To Our Valued Customers,

Dedeco, formerly a division of 3M, has been a leading manufacturer of specialty abrasives since 1937.

From inception, our continuing investment in research and development has enabled us to enhance our manufacturing processes. From our world-famous classic rubberized abrasives, primarily for the dental & jewelry industries, to our Sunburst range and diamond-filled abrasives used to remove, smooth, finish and polish today's latest dental and industrial materials, Dedeco remains the industry leader in cutting-edge abrasive technology.

We have also continued to invest in our website - **dedeco.com**. The site now features new product filters, a resources section with SDS, application profiles, foreign language catalogs and more. Sign up to our newsletter to receive new product announcements, promotions, helpful tips and invitations to special events.

Progress has not changed our values. We still believe in providing personalized customer service and delivering only superior quality products innovated to meet the ever-changing needs of the diverse industries we serve worldwide – these are the hallmarks that have always, and will always, set Dedeco apart.

We are truly grateful for the support our customers have shown throughout the years. Your loyalty has been the driving force behind our growth and success. We look forward to continuing to serve you with excellence and innovation.

On behalf of our entire team and the generations of employees that preceeded them, we offer our most sincere thanks.

WHAT IS SUNBURST[®]

Dedeco[®]'s trademark for our range of thermoplastic-bonded abrasives, specifically designed to compete with 3M[®] Scotch-Brite[®] Radial Bristle Discs, for deburring, finishing, cleaning and polishing metals, plastics, woods, ceramics, acrylics and composites.

3M[®] pioneered it -  perfected it.

Simply stated, we offer comparable quality, adopted their well established color-code to facilitate substitution and are responsive to our customers' needs. We also offer more grits and dozens of unique shapes and sizes, including our patented dual and knife-edge designs.

Grits

Aluminum Oxide
Silicon Carbide
Pumice
Diamond
Plastic

Available individually and in handy assortments.

Works with MOTO-TOOL[®] and Dremel-type handheld rotary tools, bench and pedestal grinders as well as CNC and automated manufacturing machines - where consistency and durability are valued.

LIMITLESS APPLICATIONS

Industrial - Deburr, clean, finish and polish across grit sizes ranging from 36 to 2000. From heavy removal to blending and mirror-like polishing, in manufacturing and maintenance operations, SUNBURST® covers virtually all applications.

Jewelry - Precision range is ideal for finishing, smoothing and high-lustre polishing of all precious, semi-precious and non-precious metals. Pumice discs will not scratch stones. No compounds, rouges or pastes required.

Medical & Dental - Our unique silicon carbide range is the preferred choice to avoid contamination in manufacturing medical instruments. Diamond, silicon carbide and aluminum oxide grits are suitable for dental materials. Sterilizable & autoclavable.

Woodworking - Superior to sandpaper, flap wheels and other types of sanders, brushes and abrasive wheels. Ideal for cleaning detailed areas and texturing for woodcarvers & woodworkers.

Automated Manufacturing - From deburring of turbine engine components to polishing airfoils after milling, using SUNBURST® on robotic finishing systems for the aerospace and power generation industries reduces or eliminates manual labor, lowers unit costs and achieves new levels of consistency.

- Wood - Sanding, Defuzzing & Denibbing

HELLO, RADIAL DISCS GOODBYE, WIRE BRUSHES

SUNBURST® radial bristle discs and brushes are the preferred alternative to wire, nylon and non-woven abrasives. Experience improved performance without threat of injury.

- **Safer** - Danger from high-velocity needle-like flying wire is eliminated.
- **Gentle** - Will not scratch or gouge the underlying surface.
- **Better** - Works faster and more efficiently than wire brushes. Easily achieve a consistent, quality finish with light pressure. Non-loading.
- **Sterilizable** - Essential benefit for medical and dental where health concerns are paramount.
- **Cool Running** - Open structure generates minimal heat reducing potential damage or distortion to the work surface.
- **Dust Free** - Durable, dust-free alternative to non-woven abrasives.
- **Long-lasting** - Uniformly blended bristles guarantee extended wear life and a consistent, uniform finish.
- **Operating Speeds** - Lower speeds allow a softer touch, greater flexibility and more subtle results. Higher speeds provide more aggressive material removal. Using the tips of the bristles with light pressure maximizes disc life.
- **Conformability** - Flexible bristles conform to contours, cracks and corners while working equally well on flat surfaces.
- **Modular** - Use a single disc for tight areas like slots and grooves. For larger surface areas stack them as high & wide as your imagination, machinery and equipment will permit. (See mandrel guide, next page).

Abrasive-filled throughout

COMPARE TO TRADITIONAL ALTERNATIVES

	CONFORMABILITY	DURABILITY	CONSISTENCY	SAFETY CLEANLINESS	PERFORMANCE	OVERALL
 WIRE	Minimal conformability; heavy pressure required	Long lasting but loses shape quickly	Inconsistent - finish varies from part to part	Ejects high velocity, needle-like wires (messy and dangerous)	Unreliable - inconsistent material removal	OK
 NYLON	Moderately conformable	Short life	Inconsistent - performance drops off quickly	Used fiber debris may plug dust collectors (hard to clean up)	Good finish and cut. Short life.	Good
 NON-WOVEN	Very conformable	Short life	Consistent finish	Used fiber debris may plug dust collectors (hard to clean up)	Good finish, low cut performance, short life	Better
 SUNBURST	Very conformable; Minimal pressure required; Operator preferred	Long lasting - uniform performance throughout product life	Consistent finish - uniformly blended bristles assure quality finish	Safe, clean & easy to use	Good finish, consistent material removal, long life	Best

BRISTLE DISC GUIDE

TC and TA must rotate with the radius of the bristles

TC - Curved, thinner bristles for greater conformability than **TA** and **TS**.

TA - Angled, thicker bristles for greater aggressiveness but less conformability than **TC**.

TS - Straight bristles for aggressive bi-directional cleaning and deburring.

COLOR-CODE & APPLICATIONS

	Remove		Smooth		Finish		Polish		
Aluminum Oxide	36	50	80	120	220	400	6μ	1μ	Metal, Wood, Plastic
Pumice							600		Jewelry - will not scratch stones
Diamond							1μ		Metals & Dental Composites
Silicon Carbide	90		240		400		1000		Metals - Medical, Aero, Food Grade

6μ ≈ 3,500 Grit | 1μ ≈ 14,000 Grit

SR (Sealant Removal) CUTTERS

For fast, effective aircraft seam sealant removal without damage to the underlying surface.

ITEM	DESCRIPTION	QTY
1838	3/8" (9.35mm) Ideal for use in hard-to-reach areas and tight corners	50
1839	3/4" (19.05mm) Features an internal cavity for fitting directly over standard fasteners and rivets	50

Max. RPM 1,000

Designed to replace messy chemical solvents and slow & inefficient hand scraping. SR Cutters' sharp resin-bonded blades quickly remove the usually thick coatings of polysulfide and polythioether material applied to the seams of wing panels and fuel tanks without damage to the substrate.

SR Cutters have a 1/4"-28 mandrel which threads directly into a right angle drill.

Use with right angle drill

CASE STUDY

Customer Description: Specializes in aircraft maintenance, modifications, conversions, and technical solutions. When customer was conducting internal testing, the goal was to look for a cost improvement as well as a quality replacement.

Ideal for use in hard-to-reach areas and tight corners

NANO-TECHNOLOGY - IDEAL PERFORMANCE

THE DENTAL INDUSTRY'S LONGEST-LASTING MILLING BURS

While diamond has long been the dental industry's abrasive of choice due to its exceptional strength and durability chemical vapor deposition (CVD) diamond technology, originally developed for the semiconductor industry, is now the state-of-the-art for applications where plated diamonds have reached their limit. This technology allows us to deposit and grow uniform diamond coatings directly on the carbide burs resulting in dramatically extended tool life.

The science and nanotechnology used in manufacturing this performance-enhanced range is unparalleled. Dedeco's CVD-Diamond Milling Burs are the dental industry's longest-lasting.

UNIQUE DIAMOND BONDING TECHNOLOGY EXTENDS TOOL LIFE

X20 X1000 X4000
MICROSTRUCTURE IMAGES

Revolutionary ★ Titanium Nitride Coating

Guaranteed minimum of 3 times extended tool life. Faster, smoother & cooler finishing of all materials

Carbide Bur **Goldies®** – a combination of top quality tungsten carbide burs to which is applied a unique permanent .0001" gold-colored titanium nitride coating – are the latest in abrasive technology.

As a result of the titanium nitride coating process both the “durability” and “performance” of the burs are vastly enhanced. Specifically, the coating hardens the carbide surface permitting the cutting edges to remain “sharper” for a longer period of time. During operation the coating also acts as a continuous lubricant enabling the “sharper” burs to provide a smoother finish at higher operating speeds.

Frequently, with uncoated tools, chips will adhere to the tool itself. When this happens, the chips are eventually pushed back into the workpiece and a ragged surface finish is the result. Chips formed by titanium nitride coated cutters have less tendency to adhere to the tool. The smooth cutting action and easy chip flow both contribute to improved surface finishing.

Any procedure that is presently being done successfully with uncoated carbide burs can now be worked far more successfully with Carbide Bur **Goldies®**.

Composite Trimming & Finishing - FG Packed 1 per unit

12-fluted for fast, smooth, trimming and finishing of composite; also suited for porcelain, acrylic and amalgam.

Metal Cutting & Finishing - FG Packed 1 per unit

For fast cutting and finishing of amalgam, gold and non-precious metals.

Lathe Burs Packed 1 per unit

3/32" (2.35mm) shanks

Diamond-Cut

For "fine" adjustment of acrylic, composite and porcelain. Ideal for final trimming and finishing in "hard to reach" areas.

Spiral Fine Cross Cut: [SPF]

Spiral cross cut fine toothing design is ideal for trimming all soft acrylics. "Shaving" effect on all metals.

		
G79SPF 040	G129SPF 023	G251SPF 060
8375	8376	8377

3/32" (2.35mm) shanks

Fine Straight Blade Cross Cut: [FST]

Straight blades with finer cross cuts are engineered to trim mouth guard and soft relene material. At 15,000 rpm, FST cutters are ideal on titanium.

Supercoarse Cross Cut: [XG]

For fast reduction of acrylic, stone and removal of soft relene material.

Superfine Cross Cut: [SF]

Superfine cross cut toothing design is ideal for texturizing porcelain, metal substructures and temporary acrylic restorations.

Coarse Straight Blade Cross Cut: [GSQ]

The GSQ is excellent for trimming soft relene material with its straight coarse blades and cross cuts.

Coarse Cross Cut: [SG]

Coarse, wide cross cut toothing design is ideal for rapid bulk trimming of acrylic and plaster.

Coarse Titanium Toothing: [GTi]

This special toothing design stabilizes the cutting edge allowing for a more aggressive cut.

Bulk Cross Cut: [GE]

For fast, smooth reduction of acrylic, plaster and stone.

Vacuum Form

Ideal design for cutting acrylic base plate materials.

6 Piece Kit 8350

Popular set for adjusting metal, acrylic and stone. Includes "free" lucite bur block.

Euro Carbide Burs

Packed 1 per unit

3/32" (2.35mm) shanks

Fine Straight Blade Cross Cut: [FST]

Straight blades with finer cross cuts are engineered to trim mouth guard and soft relene material. At 15,000 rpm, FST cutters are ideal on titanium.

Supercoarse Cross Cut: [XG]

For fast reduction of acrylic, stone and removal of soft relene material.

Superfine Cross Cut: [SF]

Superfine cross cut toothing design is ideal for texturizing porcelain, metal substructures and temporary acrylic restorations.

Coarse Straight Blade Cross Cut: [GSQ]

The GSQ is excellent for trimming soft relene material with its straight coarse blades and cross cuts.

Coarse Cross Cut: [SG]

Coarse, wide cross cut toothing design is ideal for rapid bulk trimming of acrylic and plaster.

Coarse Titanium Toothing: [GTi]

This special toothing design stabilizes the cutting edge allowing for a more aggressive cut.

Bulk Cross Cut: [GE]

For fast, smooth reduction of acrylic, plaster and stone.

Vacuum Form

Ideal design for cutting acrylic base plate materials.

6 Piece Kit 9350

Popular set for adjusting metal, acrylic and stone. Includes "free" lucite bur block.

Jeweler's Carbide Burs

ELITE Fibreglass-Reinforced Discs

Simply the Best!

Multi-purpose · Shatterproof · Fibreglass-Reinforced Cutting Discs

ULTRA THIN Diamond Packed 10 per box

Diamond-filled fibreglass-reinforced discs for separating discs for ceramics, zirconium oxide and lithium disilicate. Minimal vibration and heat to prevent cracking and chipping of ceramic materials.

3/4" x .009" (20 0.2mm)	3/4" x .012" (20 0.25mm)	3/4" x .015" (20 0.3mm)	1" x .012" (26 0.25mm)	1" x .015" (26 0.3mm)	1.6" x .018" (40 0.4mm)	1.6" x .020" (40 0.5mm)	1.6" x .027" (40 0.7mm)

ELITE Non-Reinforced Discs

No matter what the material being worked, be it porcelain, gold, composite, enamel, acrylic, zirconium or any of today's numerous semi-precious and non-precious ceramic metals, DEDECO offers the "perfect" disc to do the job quickly and professionally.

Silicon Carbide Discs & Wheels - Multi-purpose

The industry's "longest-lasting" cutting discs and wheels.

Special dual-bonded resin binder ensures maximum durability and performance. ELITE silicon carbide cutters are ideal for porcelain, gold, enamel, zirconium and crown & bridge metals. Thicknesses from .005".

Koolies® “No Heat” Grinding Wheels

Packed 50 per box

The industry standard. Non-clogging binder continuously exposes sharp new abrasive with “absolute minimum” of heat. Special metal bushing assures perfect centering, true-running and safety.

Coarse (silicon carbide)
The traditional
“multi-purpose” favorite.

Fine (silicon carbide)
The “preferred choice” for porcelain
and enamel. Leaves smoothest
surface. Easiest to polish.

Fine (aluminum oxide)
“Non-contaminating.” For
finishing non-precious and
semi-precious metals.

Coarse (aluminum oxide)
For faster finishing of
non-precious and semi-precious
ceramic metals.

Flexible Shaft Stones

Packed 1 per unit

Compare with Xebec®

Ceramic-bonded 220 grit aluminum oxide stones on flexible shafts specially designed for detailed finishing and deburring both front and back of a drilled hole. Flexible shaft allows soft contact with the work piece and suppresses subtle vibrations.

Suitable for use in CNC machines, robots or hand-held rotary tools.

No matter what the material being worked, be it aluminum, copper, brass, steel, iron, titanium or any of today's high temperature alloys, Dedeco flexible shaft aluminum oxide stones are the economical instruments of choice.

WELCOME TO STAINO®

Our unique range of aluminum oxide abrasive-filled oral hygiene aids scientifically proven safe and effective for removing plaque and surface stains from teeth.

STAINO® TECHNOLOGY

Developed jointly with world-renowned **DUPONT** and **Dedeco**, the dental industry's leading manufacturer of abrasive polishers, we are able to blend ultra-fine white aluminum oxide abrasive particles into micro-thin nylon filaments to create our unique interdental brushes & dental floss and in latex-free rubber to produce our tooth stain eraser and iCLEAN® stain removing prophylactic, latch & screw type cups.

As a result, unlike other manufacturers' standard filament and polishing products which work solely on the basis of friction, STAINO® products – taking advantage of the abrasive particles used by dentists for decades – are scientifically proven to safely remove surface stains while simultaneously more effectively removing food particles and plaque.

SEM Micrograph (500X) STAINO® Filament with Abrasive Particles

WHAT'S NEW

It is with great pride that we introduce iCLEAN® and incorporate it into the STAINO® family of products.

iCLEAN® is the world's first and only disposable prophylaxis angle and prophylaxis cups that effectively clean, polish and remove stains.

Proven safe for enamel and gums, the micro-fine aluminum oxide abrasive particles uniformly blended within the "soft" flexible rubber cups ensure effective performance on all tooth surfaces – facial, lingual, interproximal & subgingival.

Eliminates spot stains even when used without prophylaxis paste. Splatter is virtually eliminated and visibility during cleaning is markedly improved – a more efficient process for hygienist and patient alike.

CONTINUING SUCCESS

We are also proud of the ever-increasing popularity and world-wide success of our interdental brushes, dental floss – including Flossbox® and Floss 'n Toss® – as well as the Tooth Stain Eraser which is a #1 seller on Amazon.com.

The scientific studies are undeniable – STAINO® technology clearly outperforms the competition.

Thank you for your support of our products – it is truly appreciated.

THE STAINO® TEAM

iCLEAN®
PROPHY ANGLE
100 per box

- Micro-fine stain removing aluminum oxide abrasive is blended within the "soft" flexible cups
- Proven safe for enamel and gums*
- Clear difference in tooth color from pre-to-post usage*
- Eliminates spot stains even when used without prophylaxis paste. Splatter is eliminated and visibility improved

Say 'NO' to Tooth Stains

Also available in latch and screw models, the "soft" stain removing i CLEAN® prophylagy cups effectively clean all tooth surfaces – facial, lingual, interproximal and subgingival. Transitions easily from tooth to tooth.

i CLEAN® Testimonials

"Just love it! Stain removal is so much easier - especially in combination with my regular paste. Great time saver! This product is a true game changer."

Lizzy RDH - Boston, MA

"My hygienist can't stop raving. Over the years she tried every brand on the market and never found any remotely comparable. Her job is easier and our patients happier."

Rachel DDS. - New York, NY

Say 'NO' to Tooth Stains

STAINO® offers the industry's widest range of interdental models for convenient at-home and on-the-go use.

No matter the task – be it removing plaque and food particles between and around teeth, bridge abutments, implants and braces or removing tobacco, coffee, red wine, cola and other tooth surface stains – STAINO® offers the ideal, shape and size interdental brush and easy to use handle to work quickly and efficiently.

FOR TIGHT TO WIDE SPACES

SAFE FOR BRACES AND IMPLANTS

REDUCES GINGIVITIS

FREQUENTLY ASKED QUESTIONS

WHY ARE STAINO® INTERDENTAL BRUSHES UNIQUE?

Ultra-fine white aluminum oxide – a proven dental stain removing abrasive – is blended within the nylon bristles for faster more effective plaque and stain removal. Other manufacturers' interdental brushes are just nylon and work solely on the basis of friction.

IS THE ALUMINUM OXIDE ONLY IN THE GREEN-COLORED BRISTLES?

No, it is blended in all the bristles, green and white. The green band simply makes it easier to identify a genuine STAINO® Interdental Brush.

WHY ARE STAINO® INTERDENTAL BRUSHES BETTER?

The ultra-fine white aluminum oxide in STAINO® bristles remove plaque and difficult stains much faster while simultaneously whitening tooth surfaces.

WHAT TYPE OF STAINS DO THEY REMOVE?

Surface stains commonly caused by tobacco, coffee, tea, red wine, cola and red sauce.

TOBACCO

COFFEE/TEA

WINE

COLA

RED SAUCE

ARE STAINO® BRUSHES SAFE?

Absolutely. In both laboratory and clinical studies STAINO® Interdental Brushes have conclusively been proven safe.

ARE THE WIRES PLASTIC COATED?

Yes, therefore also safe for cleaning around implants.

WHAT IS THE SIGNIFICANCE OF THE COLOR-CODE?

The different colors on the packages and brush handles identify the various shapes and sizes of the brushes.

HOW MANY SHAPES AND SIZES ARE AVAILABLE?

Five. Two shapes. Three sizes.

WHY SHOULD I USE STAINO® INTERDENTAL BRUSHES?

STAINO® Interdental Brushes are the most effective in removing plaque and difficult stains between teeth, where most staining and decay occur between professional cleanings.

STAINO® brushes also reduce gingivitis as part of a good oral hygiene program and supplement regular professional care.

TWINS®

Patented Dual-Ended Handle

STAINO®'s patented dual-ended handle feature stackable aerated caps for better control and greater reach. Convenient for at-home and on-the-go use, TWINS® are available by individual shape and size.

TWINS® Testimonial

"Using these is an easy way to follow my dentist's cleaning between-the-teeth recommendation. They can be taken on trips and are easy and convenient either at home or away."
